C. SMART TOP™ RECLOSABLE CUP LID DIXIE FOODSERVICE

The added security of the patented sliding tab increases the level of functionality compared to most hot cup lids, elevating the to-go experience for consumers by helping to relieve concerns for beverage splash, even in vehicle cup holders. For years standard hot cup lids have either used an open-style or pull-back tab for on-the-go beverages, leaving hot coffees or teas exposed. The Smart Top™ reclosable lid protects your beverage with the sliding plastic tab that moves forward or back with one hand to seal the drink opening.

J. TROPHY® HOT/COLD CUPS SOLO®

Keeps cold drinks cold and hot drinks hot with insulated thin-wall laminated polystyrene foam. Durable two-layer construction resists crushing from day-to-day handling. Solid, non-permeable sidewall resists seepage, which can occur over time with the open-sidewall construction of beaded foam. Rolled rim offers upscale, paper-like image. Lugs provide improved stackability and nesting. Foaming materials used have low Global Warming Potential (GWP) and no Ozone-Depleting Potential (ODP). Does not contain BPA. Trophy® uses less material than paper or non-foamed plastic cups (Trophy® is 70% air). Eliminates waste of using a cup sleeve or double cupping.
